# Components

• Removable Luer Lock Cap

• Fixation wings

• Injection port

• Push-off tab for easy threading

- Cannula in transparent Teflon (FEP) or Polyurethane (PUR) resistant, flexible, non kinking. Thin wall catheters with 3 embedded X-Ray contrast lines for x-ray opacity
- 325 PSI HP (no 26G)

• Flashback Chamber

• The Safety Device

• Triple sharpened needle tip, delivers a smooth insertion, reduces pain perception and minimizes skin stress and infections risks ensuring a fast healing

## Available in 3 Models

• Safety Catheter single entry w/o wings

• Safety Catheter single entry w/wings

• Safety Catheter dual entry w/wings

### The Safety Device

- Reduces risk of accidental needle sticks
- No change of handling technique needed
- It is self activating during needle extraction
- It covers completely the needle point providing a reliable protection

### Extensive range

- PUR / FEP Polymer Cannulae
- Gauges from 14G to 26G
- Patented
- 325 PSI HP (do not use 26G for high pressure treatments)
